Total circulation	8,268

The circulation for the year has been 8,268 volumes of which 2,318 was from the branch library at New Rye. This is an average weekly circulation of 159 volumes. This does not include the use of books in the reference room. Post card notices have been sent to persons interested in special subjects. Reserve cards have been kept. Leading events in current news have been noticed by appropriate exhibits of books and pictures displayed in the library.

Children's Book Week saw a display of new and desirable books in the reading room. Book Week Posters made by the High School girls were on display. Also a set of twelve pictures depicting the evolution of writing from the stone age down to the present time. A Book Week costume party was held for the school children of the town in the church vestry. The children presented three Book Week plays. Several pictures of the children in costume were taken and presented to the library. The work has gone on in excellent order and the librarian desires to make public recognition of the ready and willing and efficient service given by the assistants taking charge of the desk circulation.

To the members of the Board of Trustees, the librarian returns grateful acknowledgment for counsel and interest in the various forms of library activity.

Respectfully submitted,

LAURA Y. BICKFORD,
Librarian.

REPORT OF SUPERINTENDENT OF SCHOOLS

To the School Board and Citizens:

I herewith submit my twelfth annual report of the schools of Epsom, for the year ending June 30, 1931.

There were maintained during the year, six schools, for a school year of 37 weeks, with no change in the teaching force.

The school enrollment was 116, with a daily average attendance of 95.51 per cent.

The schools were in session on an average of 358.33 half-days, a gain over last year of 7.9 half-days.

Of the six teachers employed all have state certificates; five are graduates of a normal school and one a graduate of Dewey Training School.

Health

Hygiene, sanitation and physiology are taught in all our schools with emphasis placed upon pure foods, pure water, need of ventilation, and the evil effects of alcohol, nicotine and narcotics.

Health inspection of the school children by our school nurse covers all contagious and infectious diseases and most of the bodily defects, seeking to equip our pupils with good physical development and vigorous health. The school nurse, Miss Douillette, by her fidelity and industry has succeeded in having many defects remedied and has had the hearty co-operation of parents, physicians and surgeons.

Child Training

The principal training ground for the child's mind is the home and the school. History pointing out that our present civilization has developed as a result of conflict and strife, shows that the problems and difficulties overcome by the child at home and at school determine his behavior, ambitions and, in fact, the whole course of his existence.

As in childhood the teeth and gums need hard food to chew, and the muscles need resistance to work against, so the child's mind needs worthy problems and difficulties to contend with and conquer, both for his present happiness and future welfare.

Parent and teacher should realize that it is the duty of the child to do the work, and their duty to direct how the work is to be done without waste of time and energy. The early New England home in which each member of the family had its daily tasks to perform, is a valuable lesson for modern parents to learn and to heed.

The advice of a few educators, — (only a few), to assign only agreeable work to the child, is unwise and fallacious. The greatest happiness and success in life comes from the accomplishment of worthy deeds; as one noted educator said "in getting the thing done." Unless the individual, through his own thought-process gains knowledge, can he hope that this knowledge will serve him in his time of need.

School Conditions

The work in our schools is being well done. The teachers are industrious and are carrying out the state program of study with a well planned daily time-table

and are supervising the conduct of the pupils on the playgrounds.

The few disciplinary troubles are chiefly caused by the lack of home training and parental government, making the duty of the teacher more difficult and the school life of the pupil less pleasant and his work less efficient.

The work of the school board in improving school conditions is commendable. Repairs on the school buildings have been made as far as financial means would allow.

The lengthening of the school year, contracting the teachers for 180 days of actual teaching, gives to the pupils an opportunity more nearly equal to that of the cities and large villages. Combining the Short Falls and New Rye schools so that there are only four grades in each school makes the school work more efficient.

The school board is deeply interested in the welfare of the pupils and is furnishing every means in its power for good schools. It is actively co-operating with the teachers and superintendent that the pupil may have such an education as will prepare him for complete living.

Parents and citizens are invited to visit the schools frequently and parents are asked to examine carefully the report cards sent to them for their signatures. These cards are to inform the parents of the work done by the pupil and of his conduct; teachers will gladly explain any report not understood.

In conclusion I express my appreciation for the co-operation and assistance given to me by the teachers, the school board and the citizens.

Respectfully submitted,

HENRY S. ROBERTS,

Superintendent.
